ACTIONS IN COMBAT

ATTACK: Make one melee or ranged attack.

Certain features, such as the Extra Attack feature of the warrior, allow you to make more than one attack with this action.

DASH: Gain extra movement for the current turn. The increase equals your speed, after applying any modifiers.

DISENGAGE: Your movement doesn't provoke opportunity attacks for the rest of the turn.

DODGE: Until the start of your next turn, any attack roll made against you has disadvantage if you can see the attacker, and you make Dexterity saving throws with advantage. You lose this benefit if you are incapacitated or if your speed drops to 0.

HELP: Aid another creature, giving them advantage on the next ability check they make to perform the task you are helping with, provided that check is made before the start of your next turn.

Alternatively, aid a friendly creature in attacking a creature within 5 feet of you to make your ally's attack more effective. If your ally attacks the target before your next turn, the first attack roll is made with advantage.

HIDE: Make a Dexterity (Stealth) check. If you succeed, you gain the benefits described in the "Unseen Attackers and Targets" section.

READY: Wait for a particular circumstance before you act, before the start of your next turn.

Decide what perceivable circumstance will trigger your reaction. Choose the action you

will take in response to that trigger, or you choose to move up to your speed in response to it.

You can either take your reaction right after the trigger finishes or ignore the trigger. Remember that you can take only one reaction per round.

When you ready an esper power, you activate it normally but hold its energy, releasing it with your reaction when the trigger occurs. A readied power must have an activation time of 1 action, and holding onto the power's energy requires concentration. If your concentration is broken, the power fizzles out without taking effect.

SEARCH: When you take the Search action, you devote your attention to finding something. Depending on the nature of your search, the GM might have you make a Wisdom (Perception) check or an Intelligence (Investigation) check.

USE AN ESPER POWER: Each esper power, talent, or technique has an activation time which specifies whether the esper must use an action, a reaction, minutes, or even hours to activate it. Using an esper power is, therefore, not necessarily an action. Most powers have an activation time of 1 action, so espers often use their actions in combat to activate such powers.

USE AN OBJECT: You can normally interact with an object while doing something else, such as when you draw a pistol as part of an attack. When an object requires your action for its use, you take the Use an Object action. This action is also useful when you want to interact with more than one object on your turn.

LONG JUMP: Move 10+ feet, and jump a number of feet up to your Strength score. When you make a standing long jump, you can leap only half that distance.

HIGH JUMP: Move 10+ feet, and jump a number of feet equal to 3 + your Strength modifier. When you make a standing high jump, you can jump only half that distance.

LOW-GRAVITY: 2x Jump Distance and Carrying Capacity

HIGH-GRAVITY: 0.5x Jump Distance and Carrying Capacity

SUFFOCATING: You can hold your breath for a number of minutes equal to 1 + your Constitution modifier (minimum of 30 seconds).

If you run out of breath or you're choking, you can survive for a number of rounds equal to your Constitution modifier (minimum of 1 round). At the start of your next turn, you drop to 0 hit points and are dying, and you can't regain hit points or be stabilized until you can breathe again.

SPACE VACUUM: First two rounds: No effect.

Each round thereafter: Target suffers 3d6 cold damage and 3d6 necrotic damage at the start of each turn and begin to suffocate. Instant death after a total of 10 rounds.

CONCENTRATION: If an esper power or technique must be maintained with concentration, its description specifies how long you can concentrate on it. You can end concentration at any time (no action required). The following factors can break your concentration:

- You activate another power that requires concentration.
- You take damage. Succeed on a Constitution saving throw to maintain your concentration, with a DC equal to 10 or half the damage you take, whichever number is higher.
- You're incapacitated or killed.
- You're overwhelmed by an enormous distraction, such as a corridor collapsing around you. Succeed on a DC 10 Constitution save to maintain your concentration.

ON YOUR TURN, YOU CAN:

- Move up to your speed.
- Take one action.
- Communicate with speech, gestures, or both.
- Interact with one object or feature of the environment as you move or take your action. To interact with a second object, take the Use an Object action.
