PARTICULAR CONCENTRATIONS OF UNNATURAL BEASTS AND DANGEROUS BEINGS

- Salem - Witches**  
Salem's associations with witchcraft go back generations but constant vigilance by American Rippers has reduced the threat to a negligible level. Not true. I found a thriving coven population in a remote area of the state. They are as powerful here as ever.
- California - Sasquatch**  
In a wild place called Crow Canyon, rumors have surfaced of a community of wild men that roam the northwestern United States.
- New Orleans - Voodoo**  
This bustling port's heady mix of cosmopolitan charm and tropical savagery makes it attractive to creatures of the Cital. Bokor, houngan, and zombies are found throughout the southern states, the Caribbean, and especially Haiti, but New Orleans appears to have a particular fascination for devices of voodoo. Indeed, a priestess we encountered there raised the dead to walk the streets at night. We were told that she was the first to do so in the city. In a wild place called Crow Canyon, rumors have surfaced of a community of wild men that roam the northwestern United States.
- Caribbean - Ghost pirates**  
The Caribbean has a bold and bloody past, from the daring exploits of Drake to the chilling crimes of Blackbeard. These events have left an indelible mark on the region and Rippers have reported encountering ghostly apparitions of pirate ships.
- South America - Jaguar men**  
These creatures appear not to transform like common lycanthropes but instead seem to be permanently part man, part jaguar. Whatever their origins they are thoroughly aggressive, though as yet have no links to the Cital. Encountered a Cital group heading into the Amazon rain forest before we were able to report on their activities. We saw no sign of unusual activity on this continent.
- Vienna - Frankenstein's monster**  
A creature of most prodigious strength, the original monster was the result of some unwholly medical experiment gone terribly wrong. The Cital has attempted to repeat the process on numerous occasions to create a fearsome fighting force. Vienna seems to be at the center of such efforts. I have heard these were among the first creatures the Rippers fought, so to still be encountering them speaks to their numbers. They can be found across Europe, however, not just in Vienna.
- Rome - Vatican Hunters**  
Working in secrecy sometimes means making powerful enemies. The monster hunters of the Vatican are well-armed and well-trained men in the pay of the Bishop of Rome. Rippers are aware of their existence and have been known to attack them. They are not to be trusted. I have heard that they are not to be trusted. They are not to be trusted. They are not to be trusted.
- Black Forest - Werewolves**  
An ancient foe found across Europe, the werewolves' stronghold is undoubtedly the wilderness of the Black Forest. In this dense foliage Rippers are advised to take extra precautions, as the werewolves' strength is enhanced by the moonlight. The werewolves are not to be trusted. They are not to be trusted. They are not to be trusted.
- Transylvania - Vampires**  
With Dracula dead the threat posed by vampires has diminished. Where once they thrived across Eastern Europe and beyond, now they are few and far between, protected by bands of Cital rearguards. Do not be lulled by their seeming weakness. A Cital group can still be found in the region. They are not to be trusted. They are not to be trusted. They are not to be trusted.
- Eastern Europe - Night Guard**  
Once these merciless soldiers hunted the Rippers throughout Europe and threatened to seize political power in several countries. With the overthrow of Cital leadership that threat has passed and the Night Guard have been beaten back to their Eastern European strongholds.
- Shanghai - Jiangshi**  
These monsters of the Far East are not true vampires, though some call them that. They lack the organization, cunning, and mesmerizing power of the European vampire. I undertook one such journey in search of the King Mountains, which actually do not exist. Instead we found something else that should not exist—a massive flying reptile. It escaped to a high plateau but it leads one to wonder what other wilderness regions might hide poliohistoric mysteries.
