## Traits

Vulnerable System (Impulse)- The impulse engines on the Series 6 courier are vulnerable and prone to damage. For every point of damage they sustain in combat, mark off two boxes on the damage track.

The Jyn Faisha Series 6 courier is a small, robust vessel designed to serve as a combination small transport, fighter, and scout and can be found moving small cargoes and personnel throughout the Jyn Faisha's area of influence (essentially, anywhere in the Alpha and much of the Beta Quadrant). Nimble and forgiving, the Series 6 is easy to maintain and to modify, and is well-armed for its size- but is also cramped and austere. Individual owners/operators frequently customize their vessels in an attempt to improve habitability.

*Satra* is a Jyn Faisha Series 6 courier belonging to the Jyn Erain, and serves double duty as a small transport, fighter, and scout.
